

INTRODUCING ISO 27701:2019 PRIVACY INFORMATION MANAGEMENT

An extension to ISO 27001, ISO 27701 focuses on data privacy and is a fantastic tool for demonstrating that your organisation has taken appropriate measures to comply with the comprehensive requirements of both the GDPR and Data Protection Act. This standard is designed to be integrated with ISO 27001 and ensures that you have the required processes to follow in the event of a data breach, something which as a standalone standard, ISO 27001 does not currently offer.

Who Are We?

Global QA Consultants specialises in the implementation of Information Security Management Systems (ISMS). Our Consultants are fully qualified GDPR Practitioners who have a wealth of experience working across a wide range of industries advising on best practice in data protection. GDPR and the most recent Data Protection Act can appear as very daunting documents, our Consultants can put your minds at rest knowing that they will hold your hand through the implementation process and give you a 100% guarantee of successful certification

- ✓ **Fixed Fees** - We like our clients to know the full picture with regards to the cost of implementing ISO 27701.
- ✓ **Guarantee of Success** - Providing our guidance is followed, we will guarantee that you will successfully pass your audit.
- ✓ **Trained & Experienced** - Our ISO 27701 Specialists are qualified GDPR practitioners.

Compliance

Use the standard to demonstrate to your clients, staff and third parties that you take data protection seriously.

Proactive Engagement

Proactively engage staff in awareness around cyber risks & security through an ongoing educational programme

Policies & Procedures

Have defined, bespoke policies and procedures that meet the requirements of the standard as well as your business

Data Protection Officer

If required, a DPO will be appointed. If you don't feel you have the skills in house, this is also a service we provide

Data Breaches

A comprehensive breach management process shall be defined to ensure you handle it as the ICO would expect
